# Yeastar Cloud PBX & UC Platform

Built on Yeastar's market proven communications technology, Yeastar Cloud PBX is a market-ready cloud telephony and unified communications platform designed for service providers and telecom resellers to simplify service delivery, improve management and enhance profitability.

## SIMPLIFY YOUR MANAGEMENT

Yeastar Management Plane (YMP) is a centralised service delivery platform, which supports multi-instance deployments to quickly accommodate new customers. It only takes seconds to create a new PBX instance for your customer and the PBX will be live immediately. The number of users and concurrent calls can be scaled up or down with just a few clicks. Now you can leave the tedious installation work for good.

## SATISFY YOUR CUSTOMERS

### Linkus for Desktop & Smartphones

Linkus is a unified communications softphone for Windows and Mac desktop, iPhone and Android phones. It transforms your desktop and mobile phone into a fully-featured office extension, provides consistent call experience, and offers powerful collaboration features like presence, instant messaging, CRM integration, etc.

#### Features at a Glance:

- Attended Transfer
- Automated Attendant (IVR)
- Call Forwarding
- Call Detail Records (CDR)
- Call Monitor
- Custom Prompt
- Distinctive Ringtone
- Multi-language Web GUI
- Multi-level User Access
- Music on Hold
- One Touch Recording
- Paging/Intercom
- Unified Messaging

Better yet, Yeastar Cloud PBX instance supports integration with third-party applications through API to deliver greater value to customers.

### IP Phone Auto Provisioning

Auto Provisioning allows for bulk configuration of IP phones right in the web interface, including all user information, local phone book, firmware, and so on.

### Remote Management

Remote Management tool allows you to manage, monitor and modify customer premises PBX instances without having to travel to the equipment.

We provide flexible purchasing models for you to penetrate into the hosted UC market.

### Turnkey Solution

In this OpEx model, there is no need for you to prepare the servers, and it requires minimal technical knowledge. You will have access to YMP without any setup time and start to sell right away, ensuring the fast time-to-market and quick ROI.

### Bring Your Own Infrastructure

In the CapEx model, you can reside YMP in the cloud services platforms of your choice or in your own data center; thus to stay in complete control of your telecom infrastructure and generate a recurring revenue stream as the OpEx model.
